PRESCRIPTION FOR DISCHARGE

Zero Tolerance. Infinite Risk.

DID YOU KNOW?

- More than 500 Sailors popped positive for illegal prescription drug use in the past two years.
- The rate of overdose death from prescription painkillers has more than tripled in the past decade.
- More people die from prescription painkiller overdoses than from those due to heroin or cocaine combined.
- More than half of prescription drug abusers obtain the drugs from a friend or relative.

SLIT LINE

MYTH

I can take my shipmate's medication because I'm having similar symptoms and it was prescribed by her Navy medical provider.

FACT

Even if you have a similar medical condition, another person's medication may not be right for you. Not only that, but popping positive without a legitimate prescription will result in separation from the Navy.

Protect your life and your career. Use prescription drugs the right way:

1. Take correctly.
2. Report promptly.
3. Dispose properly.
4. Never share.

For more information, speak with your command DAPA or doctor; call 1-866-U-ASK-NPC; or visit www.nadap.navy.mil.
